

DECKMASTER OUTDOES ITSELF

THE INDUSTRY'S STRONGEST
DECK CLIP SYSTEM YET

The fasteners may be hidden, but the strength of the new Grabber Deckmaster G6 Hidden Deck Fastening System is obvious. The previous generation of Deckmaster clips was already independently validated as the strongest deck clip system available. Now the improved design of the G6 system features four wings for even more gripping power.

HIDDEN DESIGN, STRONGEST HOLD

The Deckmaster G6 system securely grips deck boards to permanently lock them into place without traditional unsightly screws on a deck's surface. Its unique undermount design uses fasteners at two angles, virtually eliminating deck racking and shearing. Consistent spacing in board gapping is achieved thanks to the uniform, unibody clips; contractors can count on an even, 1/5th-inch gap between boards for a beautiful, aesthetic finish.

BUILD MORE ATTRACTIVE AND LONG-LASTING DECKS

Because Deckmaster G6 clips are completely hidden beneath the deck boards, there are no exposed screws or nails on the deck surface. As such, moisture won't pool around and enter deck boards and joists (the primary cause of deck rot and fastener pop-ups) and there's no staining or splintering around exposed screws.

The G6 system is completely hidden for greater aesthetics, longevity and safety. The four-wing design self-gaps with the industry's strongest hold.

MAKE THE MOST OF YOUR FAVORITE DECKING MATERIALS

Deckmaster G6 works with any 1/8-inch grooved decking, including NyloDeck, Latitudes, Fiberon, TREX, ChoiceDek, MoistureShield and Gossen products. The system's GrabberGard advanced corrosion protection is ACQ compliant and 1,000-hour salt spray/15 cycles Kesternich testing certified.

Grabber complements this unsurpassed level of durability with a 30-year guarantee.

The G6 system is another innovation from Grabber — the brand contractors have come to trust for exceptional performance. Pros can find the G6 system through leading dealers and distributors.

This season, deck projects are off to a strong start. Find more details at www.grabberman.com. **CS**

Find out why Grabber® is the professional's first choice

- ▶ Quick adjustment for fastener length from 3/4-in to 2-3/16-in
- ▶ Use with screw diameters from 6 - 10 gauge
- ▶ Simple design, easy to service
- ▶ Compact and lightweight industrial-strength design
- ▶ SureLock™ fine depth control adjustment
- ▶ Works with DeWalt, Makita and Hitachi drivers

SUPERDRIVE N7 AUTOMATED FASTENING TOOL ALLOWS YOU TO FASTEN INTO EVEN THE TIGHTEST SPACES
